

CUMPAN

Cockpit Assistant

**DUCATI DesertX
Model year 2022**

Installation suggestion from BEROTEC

Customer example - No guarantee for functionality

Position display

Located to the right of the tachometer.

Connection of the RPM signal ("SENS" setting: UNI - "COUNT" setting: 18)

The cable with the RPM signal runs along the left-hand side of the motor. Above the cooling hose there is a three-pin plug with a black/white/grey cable. The middle/white cable carries the RPM signal. The signal is finally connected to a branch connector and the black cable from the CUMPAN.

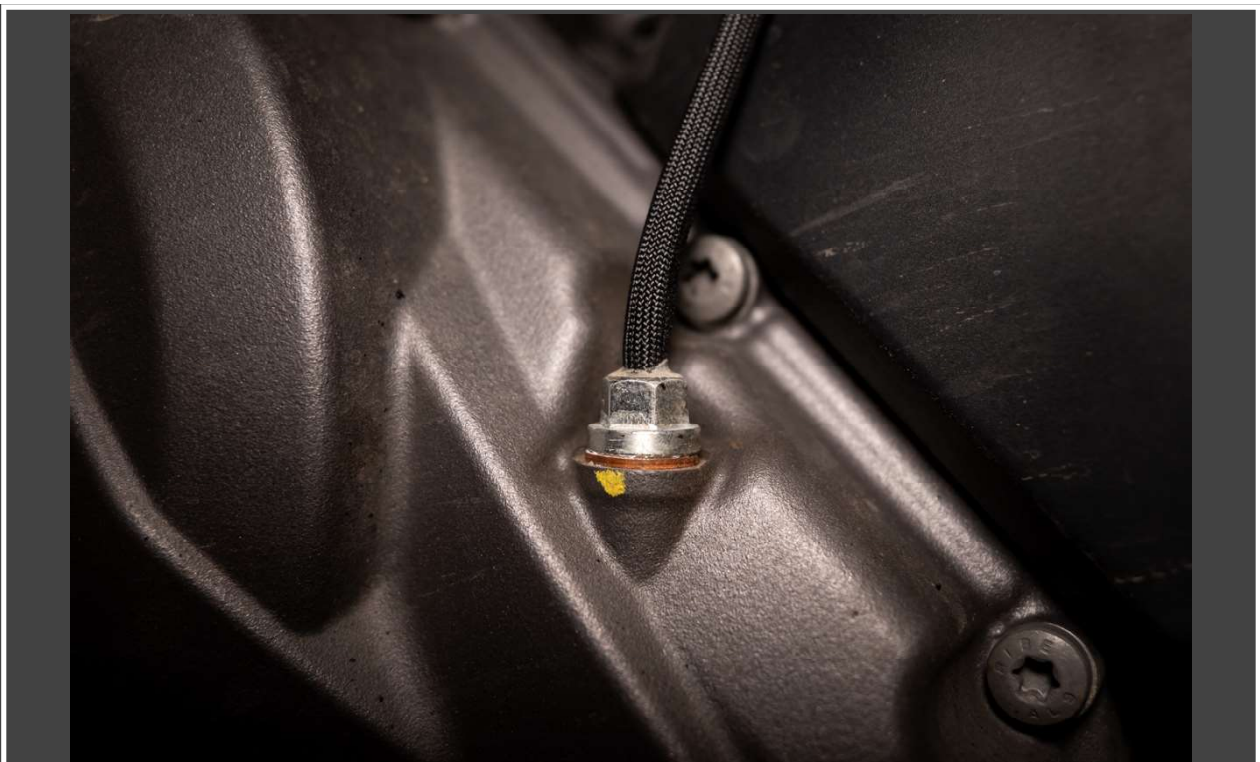

Position oil pressure sensor

The BEROTEC oil pressure sensor is connected to the supplied adapter together with the DUCATI oil pressure switch. The adapter is then connected to the original oil hose.

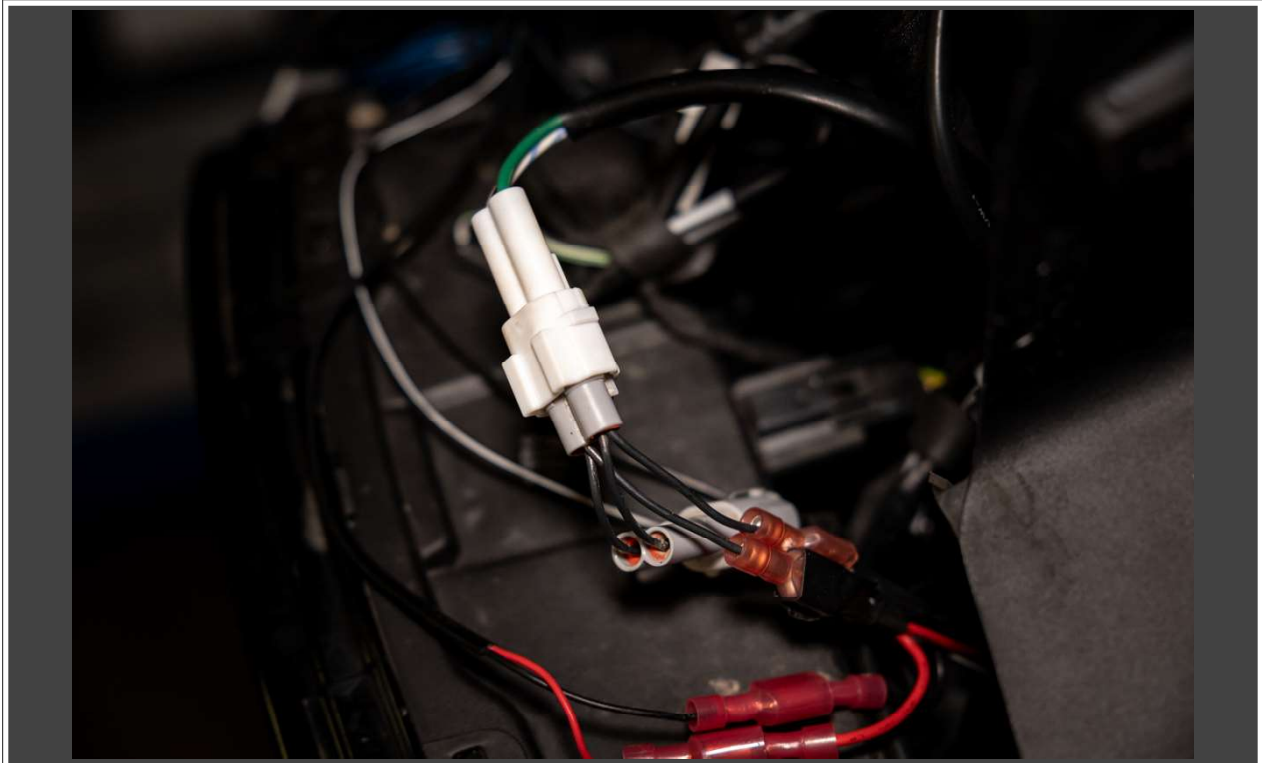

Position engine temperature sensor (M10x1)

The temperature sensor is installed on the right-hand side of the motor housing.

Power connection part 1

12 V connector plug DUCATI DesertX -> https://berotec.de/product/on-board-plug-bmw-honda/?lang=en&attribute_pa_hersteller=ducati-desertx-en

Power connection part 2

The white two-pin plug of the USB socket is located behind the speedometer, where the separately available 12V connector plug can be installed. This provides a switched 12V connection.
